

Group 4:

The STEAM activity day was very interesting and we all really enjoyed it. We learnt a lot of different things through the day including how solar energy works and how you can use the sun's energy to heat things. We had to use some materials to make some different types of solar ovens to cook marshmallows and to try to heat some water and record the temperatures.

We were split into 4 groups and each group had to work together to do all the tasks, this was fun as it made us all a bit competitive against each other.

We learned about how lots of people in the world do not have running water or electricity and have to find other ways to cook or wash. We learnt about how shapes can focus light energy and change it into heat energy. We learnt about how to make water safer to use for cooking or drinking and how to make a solar oven using simple household materials.
